For Immediate Release

New Braunfels, TX, August 2, 2010 -- ANTIOCH International, Inc. recently completed its tradeshow exhibition program at the Fuel Ethanol Workshop (FEW) held in St. Louis, Missouri. The company was one of 262 exhibitors featured in the annual event. ANTIOCH's featured exhibit presented the latest in Rail Engineering, Planning and Design, Construction Administration and Material Procurement services to the renewable fuels industry. Over 2,000 attendees took part in the three day workshop that presents a vital platform focusing on the issues shaping the industry.

About ANTIOCH

ANTIOCH International, Inc. is a nationally recognized industrial railroad engineering firm located in New Braunfels, Texas. Founded in 1997 by William J. Jones, P.E., the firm offers design and construction of complex, diverse transportation projects from mainline railroads and industrial spurs, to highway relocation projects. ANTIOCH is most recognized for developing innovative engineering solutions within the framework of today's rapidly evolving business environment.
